## INTRODUCTION

JAMES R. BEALL  
Office of Health and Environmental Research  
U.S. Department of Energy  
Washington, D.C.  
and  
President, Association of Government Toxicologists  
Germantown, Maryland

Welcome to this meeting on recent developments in pesticide toxicology and risk assessment which is organized and hosted by the Association of Government Toxicologists (AGT). On behalf of the Association's members, I thank each of you for attending and for giving us this opportunity to share with you important information on pesticide toxicology, government, and the public.
